【Educational Objectives】

- To study for self-advancement
- To make the right decision
- To be healthy in mind and body

Publisher: Headmaster Takanori Endo

The Second Semester Has Ended!

The 80-day second semester ended today. I'd like to thank you all again for your constant cooperation and support of this school's educational activities. Looking back at the second semester, although the heat of summer continued with many days of high temperatures, all in all we were able to go forward with school activities in good order. Also, the students were highly active, both inside and outside the classroom, making for an extremely fulfilling semester.

The students will start an 18-day winter vacation tomorrow. As we have repeatedly instructed them so that they can live healthy and fulfilling lives I'd like to ask those at home and in the community to also lend their voices.

I hope that everyone is able to welcome in a good New Year. I also wish for all the best in the coming year.
